Project Experience

Sportsspace – Web Platform for Sports Facilities & Communities 2023 – Present

- Designed and implemented backend modules with Laravel: routing, middleware, Eloquent ORM
- Built responsive user interfaces for facility search and community management using HTML/CSS/JS
- Integrated Google Maps API to display facility locations and geo-filter results
- Developed real-time community chat feature via Pusher and Laravel Echo
- Auth & authorization managed with Laravel Sanctum
- Documented API endpoints with Swagger and wrote PHPUnit tests to ensure code quality
- Deployed on DigitalOcean with CI/CD pipelines (GitHub Actions)
- Achieved 30% increase in user engagement and maintained average API response time <150 ms
